Facharzt für Allgemeinmedizin, Funktionelle Medizin

## Services

Dear patients,

I have consciously decided to return my health insurance license in order to be able to treat you in the best possible way without time pressure.

You will receive an invoice from me for your treatment, which is usually tax deductible. If you are privately insured, you will usually be reimbursed by your private health insurance.

The costs of my treatment are based on the current scale of fees for physicians here in Germany (GOÄ), but there is usually an increased rate necessary for my treatment.

Therefore, I cannot guarantee reimbursement by private health insurance companies in every case. Nevertheless, there is often uncertainty about the costs involved, so I have listed some examples here:

Initial intake session (50 min.)	170,00 €
Follow-up session (50 min.)	170,00 €
Follow-up session (25 min.)	85,00 €
Acupuncture treatment	70,00 €
Gua-Sha massage treatment	70,00 €
Infusions *	50,00 €
Telephone calls (depending on time)	25,00 - 35,00 €

\*(I charge 50€ per infusion without active ingredient - i.e. the 50€ includes the infusion needle, 250ml infusion solution & infusion set. The active ingredient (e.g. iron for an iron infusion) is then charged separately depending on the active ingredient - here the costs depend on the active ingredient administered).

For Chinese herbal therapy, there are additional costs for the prescribed herbs.

In the context of treatment according to Functional Medicine, several detailed consultations (min. 50 minutes) are usually essential.

In addition, there are usually laboratory tests for which a fee is charged, as well as the prescription of nutritional supplements and medications.

You always have the possibility to set a cost limit before each treatment. Should a treatment be more expensive, I will inform you in advance.

This way you always have full cost control. Please contact me with further questions.

Yours,  
Bastian Hölscher
